Re: Letter of Recommendation for Matt Lewis

To whom it may concern:

I feel privileged to have the opportunity to have worked with Matt for almost 7 years and am honored to provide this letter of recommendation.

During this period, I had the opportunity to work with Matt in two different companies, originally at EORM, Inc. and more recently at ESHconnect, Inc. At EORM Matt initially started as a new college graduate as an Environmental Health and Safety consultant. As the President of that consulting firm I had an opportunity of watching him gain experience and develop professionally over a couple of years and perform at a consistently excellent level. Matt then had an opportunity to combine his love of travel with his love of teaching/training by venturing to Asia, and departed EORM's employment on excellent terms.

After a couple of years, I was very pleased to be able to hire Matt again to work with me at ESHconnect, an eLearning company specializing in online training development for environmental health and safety. In his capacity as an instructional designer Matt did an outstanding job of project managing and developing web-based training applications for a variety of customers in the electronics, semiconductor, and biotech industries. Knowing that he was worth the investment, ESHconnect assisted Matt in his completion of his Master's degree. Unfortunately ESHconnect had to close its doors at the end of May because of insufficient capital, and Matt (as well as his co-workers) had to be let go. An example of Matt's commitment to excellence occurred at the end of his employment: Matt continued to work on his own past his official termination date so he could finish one of his projects that was close to completion.

It is with great confidence that I can recommend for a position, knowing that he will excel in the future. As he has done here, he will make an excellent employee at your company.

Best regards,

Brian Sherin
